

Cinema Forte VMT

PUBLIC SPACES / HI-FI & HOME CINEMA / PROFESSIONAL AUDIO / WORKSPACES

Description

This new panel is part of the new Vicoustic's Cinema Family that also includes Cinema Piano VMT and Cinema Fortissimo VMT. Its sloping front has a minimum thickness of 60mm and a maximum thickness of 120mm, which results in an excellent absorption capacity. Furthermore, by rotating the panel you can create very interesting patterns, especially if you combine them with the other panels of the same line.

These 3 new panels are mostly made of recycled materials, and, since they were developed with VMT technology, the panels have the possibility to be customized.

Compatible with VicFix J profile, these panels can also be installed in the corners acting as a broadband Bass Trap, with enhanced performance in the low region.

Performance

NRC: 0.95

Available Finishes*

VMT Colors and Patterns
