

Super Bass 90

Professional Audio

Description

These Bass Traps, sold in sets of four units per package, are considered to be one of the best optimised solutions when treating low frequencies. They are also an excellent complement to other acoustic products.

The unique shape of all the Bass Trap options allows you to minimize the dramatic effects that result from resonating waves, commonly associated with the "boomy" sound often heard in untreated rooms. The Super Bass 90 combines several techniques to treat low frequencies in a room.

Using Vicoustic patented technology, these Bass Traps are the perfect complement to the Studio Line absorption panels.

Features

- High acoustic performance
- Easy to install
- Affordable

Performance

Available Finishes

- N/A
