

# Flexi Screen Ultra MKII

PROFESSIONAL AUDIO

## Description

Flexi Screen Ultra has over the years evolved as one of the best looking mobile acoustic shield for microphones in the pro audio industry. We now take this best-selling product to the next level, by presenting an improved version with anti-scratch melamine and eight colour patterns, including Metallic Copper and Gold: the Flexi Screen Ultra MKII.

Made from high quality materials, the exterior surface is produced in MDF with anti-scratch melamine, which helps to create a barrier and gives an attractive visual effect. Its polyurethane structure in the interior is designed to give maximum absorption efficiency.

It's the ideal portable solution for voice recording in untreated rooms or venues, which lack sufficient acoustic control. It performs on untreated and scattered room reflections, effectively isolating the sound source. The singer's energy is absorbed on the inside of the unit, producing a dryer, less ambient sound. At the same time, scattered room reflections are blocked on the outside. Flexi Screen Ultra MKII can be used with a wide range of microphones and can be adjusted either horizontally or vertically. It's the best solution for voice recording, either for singers, musicians or podcasters..

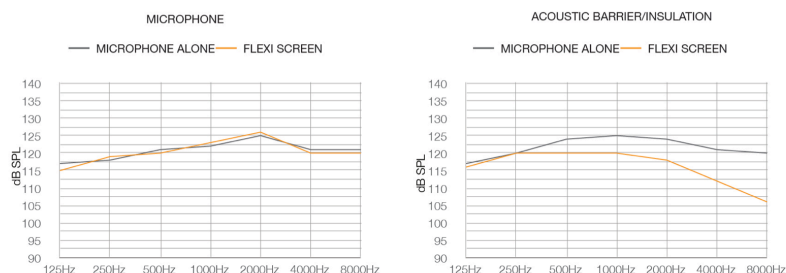

## Applications

/ Voice and instrument recording

/ Singers

/ Podcasts

## Performance

## Available Finishes\*

### Melamine

 Black Mate U999PM	 Dark Wenge H1116
