

Wavewood Diffuser Ultra

PROFESSIONAL AUDIO / Hi-Fi & HOME CINEMA / PUBLIC SPACES

Description

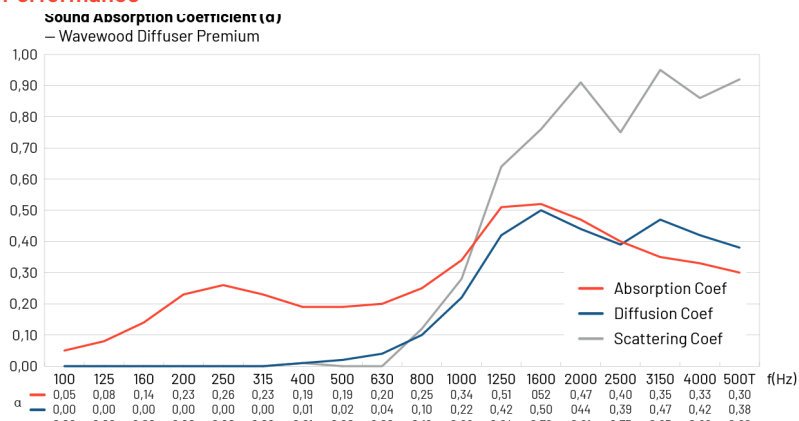

With the Wavewood design a new diffuser product arises. Simulating a QRD and MLS sequence the new Wavewood Diffuser is an ideal solution to those who search balanced sound ambiances that simultaneously control the exceeding energy in a room, flutter echoes, and still maintain a living and bright sound. It is particularly effective in treating medium and high frequencies.

This panel is made of high density polystyrene and melamine finish. The idea is to have a more competitive diffuser with low weight and easier application. It match perfectly along with the usual VicPattern Ultra Wavewood panel which means you can combine both absorption and diffuser versions without notice any differences in terms of aesthetics.

Features

- Light weight
- Easy to Install
- Resistant
- Color constant

Performance

Available Finishes
