

Multifuser DC4

PROFESSIONAL AUDIO / Hi-Fi & HOME CINEMA

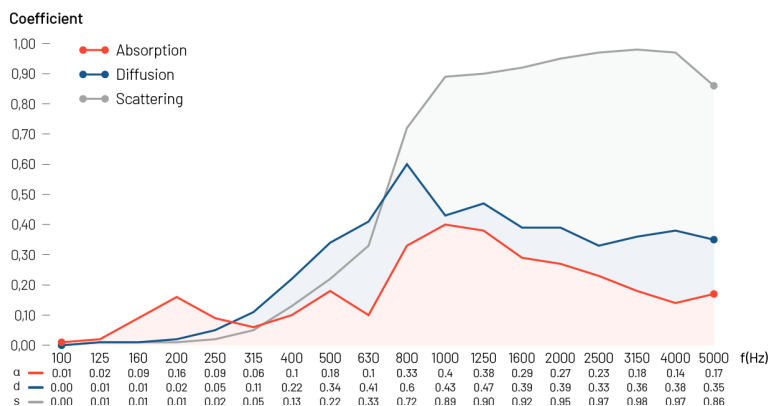

Description

Multifuser DC4 is a bi-dimensional diffusion panel that provides multi-reflection on both vertical and horizontal planes in sound-critical spaces. It performs on mid and high frequencies, brightening and clarifying sound. Made from high-quality EPS (Expanded Polystyrene), Multifuser DC4 is notable for its effective performance in solving problems like lack of speech intelligibility or music definition and its attractive design that fits perfectly in any kind of room. This 4rd generation diffuser was improved with softer edges which give the panel a more modern and fluid look and that allow a better fitting of panels during shipping. The panel have built-in holder ribs so it can be installed to a wall with a VicFix fixation system, using VicFix Mini (supplied) or VicFix J Profile 2m (sold separately). It continues to be compatible with Flexi Glue Ultra (sold separately), which is required for ceiling installation.

- High efficiency 2 dimensional Root Diffuser + Top surface angle.
- Easy to install
- Available in 3 different colours

Acoustic Performance

Available Finishes*

Colors

- . Black
- . White
- . Grey
