Installation Manual

Material Need

Included

Echo Frame Panel

Not Included

Level

Screwdriver Machine

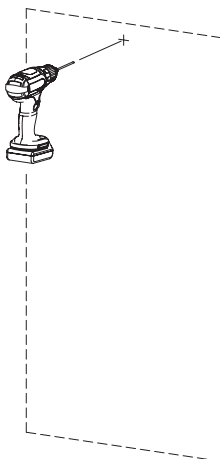

Wall Plugs and Screws

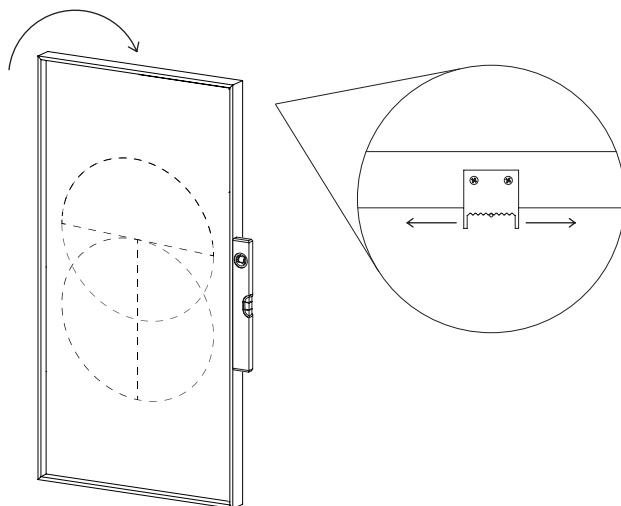

Measuring Tape

1. Before installing the panels, measure the wall where you are going to install them. Depending on the type of wall, you can fix a direct screw or use a wall plug and screw (not provided), to support the Echo Frame Panel.

2. Suspend the panel

If you choose to install the panel horizontally, unscrew the suspension clip and screw it into the middle of the long side of the frame (580mm from the edge).

The silicone drops should be applied in the lower corners of the panel.

! Do not apply Echo Frame Panel behind radiators or close to a heat source.

Vicoustic PET Panels (Non-Fr PET)

Not suitable for applications requiring fire-resistant materials.

This product is a removable decorative absorber panel and is not a building component.

It is intended exclusively for interior use as a removable decorative element, without structural or permanent connection to walls and ceilings.

It is not covered by the harmonized standards for construction products or the Construction Products Regulation (Regulation (EU) No 305/2011).
