

VicTiles 3D Brasília

PS WS

VicTiles 3D Brasília are decorative acoustic panels designed to reduce reverberation and improve sound clarity in interior spaces such as offices, hospitality environments and residential areas. Combining sound absorption with a sculptural 3D surface, they transform walls into functional architectural features.

Inspired by the modernist architecture of Brasília and the iconic forms of Palácio do Planalto, the design reflects the vision of Oscar Niemeyer. Its sweeping curves and geometric rhythm create a refined visual identity while enhancing acoustic comfort.
